

# #1 Energy Efficient Homebuilder

We are proud to be America's #1 Energy Efficient Homebuilder! Our 2024 gross HERS score of 42 was the lowest of the Top 30 National Homebuilders. How do we know? We reviewed publicly reported scores from Builder Magazine's list based on the number of homes closed in 2023.

HERS stands for Home Energy Rating System. It's a standardized system used to measure a home's energy efficiency. A lower HERS score indicates a more energy-efficient home. HERS is like a home's MPG label. A lower HERS score means lower energy bills and a smaller environmental footprint. Our average gross HERS score in 2023 was 42. To confirm our position as the #1 energy efficient homebuilder in the US, we looked at the publicly reported average HERS scores during December 2024 for each of the top 30 homebuilders in the US (based on how many houses they sold in 2023) as determined by Builder Magazine's list <https://www.builderonline.com/builder-100/builder-100-list/2024/> [builderonline.com] accessed on December 20, 2024. Beazer Homes reports our average gross HERS score i.e. without including solar power savings. We don't know for sure if the other builders report their energy efficiency scores (HERS scores) with or without including solar power savings. Pricing, features, and availability subject to change without notice. See New Home Counselor for complete details.
